launch technology missions every year in specific areas like family planning, agriculture, energy and eradication of poverty;

(b) if so, what are the details thereof; and

(c) by when these missions are likely to be set up?

THE MINISTER OF STATE IN THE MINISTRY OF SCIENCE AND TECHNOLOGY AND IN THE DEPARTMENTS OF OCEAN DEVELOPMENT, ATOMIC ENERGY, ELECTRONICS AND SPACE (SHRI SHIVRAJ PATIL): (a) to (c) The basic priority in the Seventh Plan is food, work and productivity. The effort in the Seventh Plan will be to ensure that science and technology has a significant positive impact on the functioning of the country. through improvement and enlargement of its agriculture, industry and various infrastructure sectors. For this, Science & Technology has to relate closely to the objectives in these sectors, to the investments and economics involved and to the available materials and skills. This calls for goal directed Science & Technology effort. A mission-oriented approach to technological development can foster relevance and provide motivation automatically establish organic linkages, which are live and working, between sectors which otherwise tend to remain compartmentalised, and would also introduce the sense of urgency required to meet time-targets. In the Seventh plan, it is planned to take up some missions which will have a large Science & Technology component which relate to major socio-economic sectors. Presently an exercise is being carried out to formulate specific missions in the above context. A mission oriented approach has already been followed in some agencies like Atomic Energy, Space etc.

The Ganga Project is also a mission.
